Advanced Fetal Monitoring – A Multidisciplinary Approach

Wednesday, June 1, 2022 | 7:30 am – 3:30 pm
Holiday Day Inn & Suites, Duluth, MN
& offered virtually via Zoom

Friday, June 3, 2022 | 7:30 am – 3:30 pm
Avalon Events Center, Fargo, ND
& offered virtually via Zoom

This education activity is funded by the Essentia Health Foundation.

Lisa A. Miller, CNM, JD Founder of Perinatal Risk Management and Education Services, Lisa is a certified nurse-midwife with 40 years of clinical experience in a wide variety of settings. Also an attorney, her legal background gives her a unique understanding of the impact of law on medicine and nursing. Ms. Miller served as an Assistant Professor in Obstetrics and Gynecology at Northwestern University Medical School and is published in the areas of EFM, obstetrics, and patient safety. Lisa is co-author of two textbooks on electronic fetal monitoring, as well as an EFM Workbook. She spends most of her time teaching an evidence- and consensus-based standardized approach to fetal monitoring interpretation & management, based on the NICHD nomenclature. Lisa is an active member of AWHONN and has served on the AWHONN Board of Directors.

Target Audience

Essentia Health OB/GYN physicians, advanced practice providers, nurses, and labor & delivery nurses.

Learner Outcomes

Upon completion of this program, the participant will be able to:

- Identify knowledge gaps in fetal monitoring & labor management.
- Apply an evidence-based approach of standardized interpretation and management to intrapartum electronic fetal monitoring.
- Discuss the relationship between uterine activity and fetal oxygenation.
- Utilize the NICHD terminology and two principles of interpretation in an FHR tracings review.
- Describe the relationship between documentation & deposition and discuss the legal implications of both.

CME Credit

This activity has been approved for *AMA PRA Category 1 Credit(s)*[™].
This program offers 6.0 contact hours of continuing education.
